Smart Attend — Quick Start for Lecturers

Start a session in three clicks.

Step 1 — Log In

1. Open the URL provided by your institution.
2. Enter your staff email and password.
3. You land on your dashboard showing your courses.

Step 2 — Start a Session

1. Click the **Start session** button.
2. Choose the course.
3. Set the geofence radius. Recommended: **100 metres**. Use **300 metres** for indoor classrooms with poor GPS.
4. Allow location when your browser asks.
5. Click **Start session**.

You land on the live QR display.

> ***Tip:*** *Use a phone to start sessions, not a laptop. Phone GPS is accurate to about five metres. Laptop GPS can be off by hundreds of metres, which causes students to be wrongly rejected.*

Step 3 — Display the QR

- The QR code appears on screen and refreshes every twenty seconds.
- Students scan it from their phones.
- A countdown shows the time until the next refresh.

A screenshot of the QR becomes useless within twenty seconds. That is the first line of defence against proxy attendance.

Step 4 — End the Session

1. Click **End session** when class is done.
2. Confirm the dialog.
3. Every enrolled student who did not scan is automatically marked **absent**.

Sessions also close automatically after three hours if you forget.

Extra Tools

Live attendance view

Click **View live attendance** on the QR page to see the full roster, colour-coded by status. It refreshes every five seconds.

- **Present** — scanned within ten minutes of start.
- **Late** — scanned ten minutes or more after start.
- **Waiting** — not yet scanned.
- **Absent** — set when the session ends.

Download a register PDF

On your dashboard, click **Register** on any course. You get a PDF with one row per student and one column per session, with a tick for present, L for late, and a cross for absent.

The PDF carries the institution letterhead, signatures, and stamp area.

Enroll students (when admin is away)

Click **Manage students** on any of your courses:

- **Enroll** new students by ticking the checkboxes and clicking **Enroll**.
- **Remove** students with the Remove button next to any name.
- **Search** the enrolled roster.

You cannot remove a student who already has attendance records for the course. That protects historical data.

If Something Goes Wrong

Students say "I'm too far"

Restart the session with a larger radius, for example 500 metres. Or start the session from a phone for a more accurate anchor.

QR does not appear

Refresh the page. If the problem continues, contact your administrator.

End session button missing

It only appears on the live QR page during an active session.

Session stuck open for hours

It will close automatically after three hours. You can also click **End session** if you still have the QR page open.
